Dated : *31.12.09*

**CIRCULAR No.646**

**Subject :- Relaxation in P.Q. Criteria.**

Chief Technical Examiner while examining P.Q bids of a Electrical Work observed that <sup>to</sup> illicit good response to tender call, PQ criteria regarding experience in similar works was relaxed. However, response to the tender call was still not adequate which was mainly attributed to financial criteria which was kept on standard lines and thus same was not commensurate with relaxed criteria-kept for experience in similar works.

C.T.E. has thus advised that if P.Q. Criteria has to be relaxed than both experience and financial criteria should be relaxed (and not one) to have good/proper response. The relaxation, however, is necessary when good response, otherwise is not feasible.

The above instructions shall scrupulously be followed by all concerned.
